- Please use the chart above to locate the dose amount closest to the patient's actual dose to determine which
- vial size(s) to key for the patient.
- This is in order to charge the patient for the least amount of waste. This is a single dose vial and so should be
- billed by the closest vial size(s) available.
- Rounding: If one of these doses can be attained by rounding the ordered dose down by 10% or less,
- round down to the nearest dose listed above. If the dose would require more than 10% reduction to meet one
- of the doses above, do not round. Never round up. Epic will perform this rounding automatically.
- Dose should not exceed 800 mg.
