

Transfer of Imaging Coursework Credit 4.7

Section: Academic	Title: Transfer of Credit	Policy #: SHB 4.7
Department: CHI St. Vincent – School of Radiologic Technology	Approved by: Academic Committee	Date last reviewed/revised: 2/25

PURPOSE: Facilitate students who wish to transfer to another imaging program.

Students wishing to transfer from another imaging program will have to provide proof that they were not dismissed due to an ethical or academic violation (per ARRT Code of ethics). A letter from the Program Director stating the student was in good standing will be required.

Imaging course work credit transfers will be evaluated on a course-by-course basis through comparison of course syllabi and program requirements.

If the student is approved for admission, the student will be notified of the point of entry, i.e. onset of second year or entry into the second semester of the first year.

If a student wishes to transfer to another program from the St. Vincent School of Radiologic Technology, the CHI St. Vincent School of Radiologic Technology will supply a current transcript and clinical competency documentation to the proposed accredited school. A letter indicating the status of the student will be made available to the new program if requested. College credit transfers will follow the procedure set in place at University of Central Arkansas or University of Arkansas Pulaski Technical College. All other efforts are the responsibility of the student requesting a transfer. See the tuition refund policy for questions regarding tuition reimbursement.
